

This prints a front and a back to the player piece.

For best results this page should be printed on thin card and cut with a trimmer but you can use scissors.

Children should ask an adult to help.

Create player piece

Cut out each strip, fold in half, (to give back and front) and fold out bottom squares, (to give a platform for it to stand up). You may now either use glue or clear tape to secure the back and front, (be sure to only stick the picture section). You now should be able to stand it up.
